Protect the Environment
For our Children

Color the One with the Earth symbols. Cut out the labels and place them where they will remind people to do the right thing.

You Are Sunshine

**We get our energy from the food we eat.
The food we eat gets its energy from the sun.**

The sun's energy goes into plants and trees through their leaves (photosynthesis).

The plants use the sun's energy to grow and produce the fruits and vegetables that we and animals eat.

The fruits and vegetables store the sun's energy.

Our bodies use that stored energy to live and grow.

Trees and other plants can make their own food. We can't!

Plants also put Oxygen in the air for us to breath while removing harmful Carbon Dioxide

Riddle:

Q: Why do some people get fat
but plants do not?

A: Plants are light eaters.

You Are My Sunshine

My only sunshine.

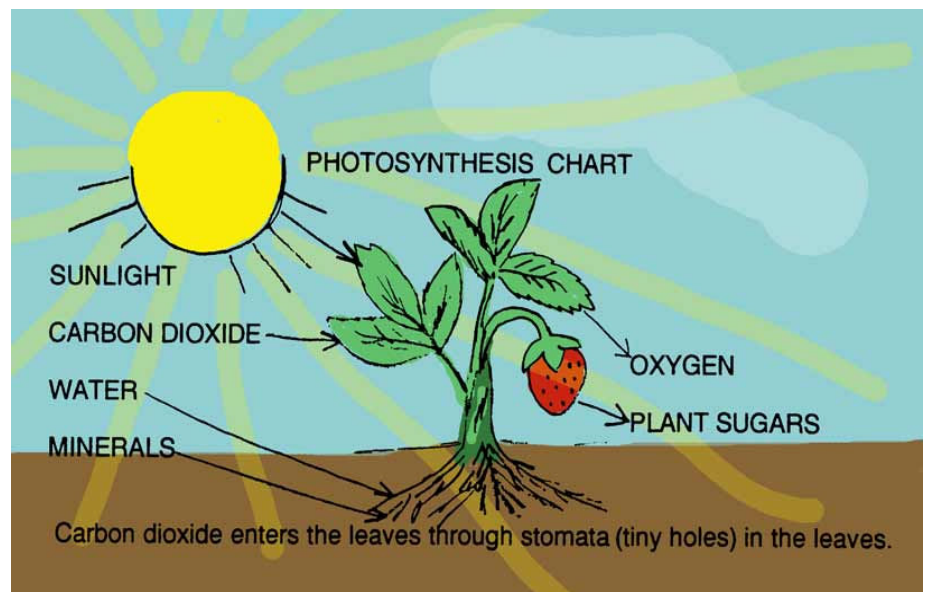

You make me happy

When skies are gray.

You'll never know, dear,

How much I love you.

Please don't take my sunshine away

'One with the Earth' Universal Environmental Symbol
Color it: Sun (yellow), Land (green-- 30% of Earth's surface),
Water (blue-- 70% of Earth's surface) The circle is **Earth**. The stick figure is **life**

The **Universal Environmental** symbol represents the one overarching environmental challenge--
ensuring a livable world for our children and future generations.

The problem-- Human Activity is depleting and degrading Earth's resources faster than nature can renew them.
